

# DETERGENT

## Isopropyl Alcohol Amine DX6508

- ☑ Degreasing performance
- ☑ Wax dissolution performance
- ☑ Dispersion performance

DX6508 can be applied to cleaning systems such as industrial wax removers, industrial oil removers, and civilian oil removers.

## Special Organic Amine Oleate DX86

- ☑ Surfactant for wax removal

DX86 is suitable for polishing wax cleaning agent system.

# CORROSION INHIBITOR

## Isomeric Borate DX1662

Corrosion inhibitor for Copper and composite metal

DX1662 is widely used in the field of metal surface treatment due to its excellent copper corrosion inhibition and composite metal corrosion inhibition.

## Copper Corrosion Inhibitor DX5863

Copper corrosion inhibitor

Improve the salt spray resistance of the system

DX5863 is widely used in water-based coatings, copper corrosion inhibitors, and other fields to protect metals from corrosion and can improve the salt spray resistance of the system.

# CORROSION INHIBITOR

## Multifunctional Corrosion Inhibitor DX5810

Aluminum corrosion inhibitor

DX5810 has excellent corrosion inhibition and rust prevention properties, and is applied in the field of metal surface treatment to provide protection for metals.

## Modified Borate DX622

Zinc alloy corrosion inhibitor

DX622 can be used in metal corrosion prevention, machining, surface treatment, and Water-borne Coatings.
